Lenticular Lens Embellishment

by E innovations inc.

MATERIALS NEEDED:

E innovations inc.—Lenticular plastic lens
Artlenz® AL 45A (backed with self adhesive)
Rubber Stamps:
E innovations inc.—Artlenz® 3X Grid
AZ 109/2s
Impression Obsession—Flower Cube
DeNami—Happy Spring
Inks:
Clearsnap—Vivid Dynamic Rainbow Pad
Pilot—Metallic Gold pen
Paper and Cardstock:
White Glossy
Yellow
Eggplant
Clearsnap ColorBox—Sponge Stylus
bone folder

INSTRUCTIONS:

Step 1

Use the stylus to ink and completely cover either side of the two-sided AZ 3X Grid stamp with the yellow part of the rainbow ink pad. Stamp the Grid on white glossy paper. (Note: Overinking the Grid stamp may flood the fine print lines and prevent the desired motion effect in the finished card. Stamp off on copy paper before stamping if the Grid stamp appears to be overinked.)

Step 2

Ink the flower with orange, red and blue parts of the ink pad and overstamp direct-to-paper over the Grid image.

Step 3

Ink the "Happy Spring" image and stamp direct to paper over the Grid image.

Step 4

Lens alignment is not critical with the grid image. Place the lens over the image and rotate the lens to see the color variations in the stamped grid. Peel the protective liner from the back of the lens and apply the lens to the card. (Go to www.Artlenz.com for more instructions and lens application techniques.) In this example, the lens was aligned so that the center square is solid yellow when viewed straight on. Turn the card over and remove any trapped air using a bone folder widget.

Step 5

Edge the card with the metallic pen. (Place the card on copy paper. Hold the pen at an angle and mark with the pen tip half on the lens edge and half on the copy paper. This will prevent the ink from wicking into the tiny grooves in the lens surface.)

Step 6

Layer over Eggplant and Yellow cardstock.

Step 7

Flex the card side-to-side to see the dramatic color change in the grid pattern.
